

Denky Girasaki Begonja

UX/UI PRODUCT DESIGNER · DESIGN SYSTEMS · AI ENABLEMENT · ACCESSIBILITY GOVERNANCE · DESIGN OPS

Glen Cove, NY — Remote/Hybrid — design@denkybegonja.com — 516.581.2160

SUMMARY

Systems-minded UX/UI product designer with 20+ years of experience spanning product design, design infrastructure, accessibility governance, and AI-enabling workflows across enterprise B2B SaaS, cybersecurity, and edtech. At ZoomInfo, evolved from product design into operational UX leadership — building training systems, evaluation tooling, pattern libraries, and accessibility frameworks that scaled across a 35-person design organization. Brings structure to ambiguity and repeatable process to emerging practice areas where no playbook yet exists.

EXPERIENCE

ZoomInfo Sep 2021 – May 2026

UX/UI Product Designer — AI Enablement & Workflow Infrastructure Jul 2025 – May 2026

UX/UI Product Designer — Design Systems & Accessibility Mar 2023 – Jul 2025

UX/UI Designer Sep 2021 – Mar 2023

- Architected the **Design Quality Engine (DQE)** — a modular, AI-powered audit system built in Claude Code that evaluates UI features against structured guardrails across WCAG 2.2 AA, usability, AI interaction patterns, content, and monetization; outputs HTML reports, Markdown decision logs, and YAML findings for scalable design review across teams.
- Designed and launched the **AI Training Portal** — an org-wide learning system housing the CHAI framework (7 training phases, 14 AI Fundamentals modules, 8+ recorded workshops) to transition a 35-person design org from traditional UX to human-AI collaboration; coordinated presenters, ran moderation, and managed resource distribution for each session.
- Built the **AIUI Pattern Library** — a governance-first component library defining AI interaction patterns, disclosure standards, processing states, and responsible AI design principles applied across ZoomInfo's AI-powered product surfaces.
- Designed the **Design Hub**, an organizational knowledge platform centralizing onboarding, process documentation, component repos, newsletters, and team directories into a single role-navigated portal adopted across the design org.
- Sole designer on the **Privacy Command Center** — a control center UI enabling enterprise users to manage data sharing permissions, consent settings, and opt-out controls; designed end-to-end from task analysis through final specs.
- Led accessibility annotation for **Admin Settings — Left Nav**: authored complete WCAG-aligned specs covering tab/keyboard order, Name-Role-Value mappings, focus management, and collapsed/expanded navigation states; reviewed and approved by accessibility contractor before dev handoff.

- Co-led design of the **Data Access & Activity Controls (DAAC)** compliance feature with a senior designer — including 3-level regional dropdown hierarchies, criteria/condition builders, data passport flows, and full ARIA annotation covering tooltips, toast messages, dialogs, and interactive controls.
- Delivered accessibility annotation packages across multiple product surfaces — including AI Accounts (tooltips, toast messages, dialogs) and Admin Portal (tab order, Name-Role-Value, focus indicators) — with specs structured for direct Storybook and engineering implementation.
- Ran bi-weekly **Design Open Hours** and **AI Open Hours** programs, consistently hosting 10+ designers per session and connecting teams with engineering, accessibility, and design systems SMEs to resolve blockers and align on implementation.
- Contributed to design systems operations in Storybook: component documentation, naming conventions, Figma-to-production token alignment, and accessibility implementation standards across MUI ecosystem transitions.

RingLead (acquired by ZoomInfo, 2021) Dec 2016 – Sep 2021

UX/UI Designer Jan 2020 – Sep 2021

Senior Graphic Designer Dec 2016 – Jan 2020

- Transitioned from Senior Graphic Designer to UX/UI Designer within the same company, taking on product experience ownership as the platform scaled toward acquisition.
- Designed customer-facing product flows, marketing systems, web experiences, and digital campaigns for a B2B SaaS data quality platform; collaborated directly with developers, marketing, and product stakeholders.
- Contributed UX/UI design through organizational growth and ZoomInfo acquisition integration — maintaining workflow continuity and interface consistency across platform transition.

Total Defense 2013 – 2016

Digital Designer — Consumer & B2B Cybersecurity Products

- Sole designer on the in-product **activation wizard** — designed end-to-end from concept through release in collaboration with PMs, developers, and external partners.
- Designed the **Xfinity BotScanner powered by Total Defense** in-product malware scanning experience and customer interaction flows.
- Produced packaging, retail display systems, digital campaigns, and large-scale conference materials for RSA and DEF CON.

CA Technologies (ISBU — Internet Security Business Unit) 2006 – 2013

Graphic Designer

- Supported digital and print design across CA's cybersecurity product portfolio over 7 years — websites, campaigns, brochures, datasheets, event collateral, and customer communications.
- Collaborated with agencies, developers, and internal stakeholders across web, marketing, and product-related design operations.

Earlier Experience · 2001 – 2006

NSI International — Graphic Designer, Toy & Consumer Products (2004–2006) · **Guarino Graphics & Design Studio** — Design Intern (2001–2004)

SKILLS

UX DESIGN	Product design · Interaction design · Information architecture · UX research · Prototyping · Design QA
DESIGN SYSTEMS	Component documentation · Storybook · MUI · Design tokens · Figma libraries · Naming conventions
ACCESSIBILITY	WCAG 2.2 AA · ARIA · Keyboard navigation · Focus management · Name / Role / Value · Live regions · A11y annotation
AI / OPS	AI UX patterns · AI enablement · CHAI framework · AI governance · Claude Code · Prompt engineering · Design ops · Workshop facilitation
TOOLING	Figma · FigJam · GitHub · VS Code · Slack Block Kit · Google Sites · Notion · Adobe CC · Microsoft 365

EDUCATION

New York Institute of Technology

BFA — Graphic Design, Fine Arts, Computer Graphics

COMMUNITY

North Shore Hispanic Chamber of Commerce of NY Aug 2023 – Present

Secretary — organizational coordination, community initiatives, economic empowerment across North Shore Hispanic community.
